

:::: Scope of Work Document

Scope of Work (SOW) - Is an agreement between an employee/contractor and employer outlining services work to be completed by the employee. SOW's are used commonly in technology jobs and contract work.

Please submit your Scope of Work Document by **Jul 2** detailing the project you plan to complete. (Make a copy and answer the questions below about your Application. You will submit with your Final Project PowerPoint/Slideshow)

Deliverables:

My application will let users post comments onto a website.

Milestones:

Core Features(min 3)

- 1. User can type in comment and name, and choose if comment is public or private**
- 2. All comments are saved into a database, but public comments are displayed**
- 3. Users can edit or delete their comment**

Special Features - How do you want it to work in the future after you have more time to develop the idea and your programming skills?

I want to actually integrate it into my personal website. Learning how to work with databases will help me become a more capable frontend/backend engineer. I am starting a blog, so I want to be able to handle comments, and have a separate guest book page for random comments. Maybe in the future, other users can like or dislike comments.

Timeline: FINAL PROJECT & PRESENTATION: Jul 23, 2025.

Requirements

Write Up / Source Code: Each Project must have a Youtube video showcasing a PowerPoint presentation containing written descriptions of the program, GUI, program flow, data structures and working demo of program. Each project must also include internal

:::: Scope of Work Document

documentation (comments explaining the functioning of the source code for the classes and methods used).
